News of Mine, of Prospect, of Furnace and of Mill.

THE BRANCH ROAD INTO NEWHOUSE

Mining Company Places Nearly \$100,000 to the Credit of the San Pedro.

With which to pay for the construc tion of a branch line of railway between Frisco and the town of Newhouse, a stretch of 7.04 miles, there was at 2 o'clock yesterday afternoon, placed by Samuel Newhouse to the credit of the San Pedro, Los Angeles & Salt Lake the San Pedro, Los Angeles & Salt Lake railway company, a check for 199,688.65, this corresponding with the estimate submited by the engineers on the cost of the extension. Immediately the company was notified by McCorniek & Co. of the big deposit, assurance was forwarded Mr. Newhouse by the local management that construction will be inausurated without delay and the inaugurated without delay and the branch made ready for traffic within sixty days. In the agreement between the San Pedro and Mr. Newhouse, by whom the money for construction is advanced in behalf of the Newhouse company, the latter is not only reimbursed but receives interest at the rate of 5 per cent per anum, and with this fund at its disposal, the management is instructed, according to a message from J. Ross Clark to rush the line to the earliest possible completion. If this is observed and of which there is no doubt, there will be no delay in the de-livery of the enormous tonnage of structural material for the reduction works with that required in the archi-tectural improvement of the town of Newhouse, as scheduled or provided for in the various contracts with the manufacturers. In the hands of the rall-way company according to advices re-leased during the afternoon, are already

four bids on construction with the con-tract to be awarded as early as possi-ble the approaching week.

The readiness with which Mr. New-house has reached into the treasury of the Newhouse mines and smelters to respond to conditions imposed upon it in establishing an all-rul compection. in establishing an all-rail connection with the world without, affords not only another impressive example of the wealth with which be has surrounded his latest undertaking, but to the enor-mity of resources that have been open-ed up by him in the Cactus group of mines adds an emphasis that could have been derived from no other source. It is throughout the most formidable example of the enterprise that has been exhibited in the State and yet not a move has been made that is not characteristic of the man behind it.

During the afternoon the contract for an air-compressor that will enable the management to break down 2000 tons of ore daily, was awarded Joseph E. Gall-guer, representing the Utah Mining Machinery company, the contract calling for an Ingersoll-Sergeant cross-compound condensing, high altitude, Corliss valve-motion machine, with a capacity of 2100 feet of free air per minute. This will have been the first com-pressor of its type to enter the State and under the contract is to be delivered in ninety days. Over the award there was the keenest rivalry and the lucky house is to be congratulated ac-

STAR PROTESTANTS MAKE A SLATE

The anti-Packard interests in the Bullion 19 Ophir 5.72/2 tar Consolidated of Tintic gathered in Caledonia 72 Overman 39 Star Consolidated of Tintle gathered in caucus during the afternoon, and by resolution committed its support to the following ticket at the adjourned annual this morning: Frank D. Klimball, Henry G. McMillan, J. P. Turner, C. S. Packard and A. C. Ellis, the selection S. Packard and A. C. Ellis, the selection of officers to be referred to the directors. The meeting was presided over by Maj. George A. Black, with William H. Farnsworth at the secretary's desk. It was largely attended, the discussion though quite protracted was harmonious, and at 5 o'clock it adjourned to meet the enemy.

The adjourned meeting of shareholders will take place in the old Union Labor hall at Second South and West

Labor hall at Second South and West Temple this morning. That no one en-titled to it might be deprived of a vote the management has kept the books open through the week, and the trial of strength should be a fair one.

BOSTON COMMENT ON QUINCY AS AN ASSET

A Boston publication, commenting on the declines in Daly West, says: is now admitted that the Quincy, absorbed by it a year ago, has not come up to expectations, and that it has been a losing proposition from the start." This, perhaps, is no more astonishing than is some other "information" dealt out by that intelligently edited market. It further velocities desir out by that intelligently edited market. It further volunteers that on the decline from above \$40, certain directors of the company have been steady sellers and the management now owns very little of the stock. Large amounts of the stock are held in Salt Lake City and Cincinnati. Cincinnati has been a large holder of Amai. Copper ever since the formation of the Copper ever since the formation of the company, and during the past six months has invested heavily in Daly West at very much higher prices.

A DAY'S CROP OF

ORES AND BULLION

In the ere and bullion market yes terday's settlements amounted to \$84,-200, McCornick & Co. reporting them as they follow: American builion, \$32,they follow: American builion, \$32-500; gold bullion, \$15,000; gold, eliver, lead and copper ores, \$35,700. In the metal market silver ruled at 54½ cents an ounce, lead at \$3.50 per hundred pounds, and casting copper at 12½ cents a pound.

GOLD ORES IN THE

CARISSA OF WYOMING

It is reported that in the Carissa group of mines, South Pass, Wyo, another channel of high-grade gold ore has been opened up, says an exchange. The owners of the property will develop it on a big scale, and whether the Belgo-American builds to South Pass or not, the Carissa will soon resume the shipment of gold on a larger scale than marked its history in the early days of the gold excitement there, when that property produced over \$1,000,000 worth of gold annually.

THE DAY ON 'CHANGE A SLUGGISH ONE

The day's business on the mining ex change was confined to 13.419 shares of stock, that brought \$4187.50 Con Mercur was again the biggest object in the claughter-house and at the close had been knifed down to ill cents, with a total of \$180,000 for the mines and mills, the cost of the latter exceeding those figures. Grand Central fared better, and rumors that its dividend would be increased to 12½ cents before the end of July advanced it to \$4.7, while Daly West, with Boston settling the pace, moved up to \$22.15. Under the weight of a 5-cent assessment levied the previous evening, Lower Mammoth was reduced to 20 cents, while Tetro railled and brought 28. Star Con, with the scrap to be reopened at 10 o'clock this morning, was actively dealt in stround 15½ cents, with New York steady at 12½ cents, while Sacramento, on rumors that the company would pass the May dividend, receded to 15½ cents, with a future going at less, the day closing on the following market: hange was confined to 13,410 shares of

Boston Copper Market. (By Hornblower & Weeks, Brokers.) BOSTON, Mass. April 22.—The local market was rather flat today. There was some buying of home investments stocks, but very little interest was shown in copper shares. Prices, however, maintained their firm undertons, and in some instances gains were made where trading was done, but the fluctuations were most.

DENIES INSOLVENCY OF THE MAJESTIC

The Colorado Iron-works of Denver has more confidence in the ability of the Majestic Copper Mining and Smelting company to work its way out of present entanglements than has the army of creditors who have sought to force it into involuntary bankruptcy and in a document filed with Clerk Letcher of the Federal court, denies the acts of bankruptcy set forth in the acts of bankruptcy set forth in the petition. The document, which was filed by George B Greenwood, attor-ney for the protestant, recites that the Colorado Iron-works, by which the smelter out of Milford was built, is a creditor of the protestant to the ex-tent of \$3161.19, and that to enforce payment it began an action on March 12th last, in the District court, Beaver country, to recover said sum, with incounty, to recover said sum, with in-terest. On the same day an attach-ment was issued, and on March 15th the Sheriff levied on the Gomer and Contact lodes, together with certain personal property of the Majestic com-This attachment has never bee discharged, the company says the protestant was not a bankrupt when the levy was made and should not now

be declared so by the court.

To sustain this it is said the protestant will ask the right to establish that the assets of the company have a valuation greatly in excess of its liabilities, as was recently done at Millord, and during an attempt to force the des, as was recently done at Millord, and during an attempt to force the house of McKeen into bankruptey. Meanwhile it is said that Eastern interests in the Majestic are seeking means with which to extricate it, and that a letter has been received telling of progress. of progress.

SILVER AND LEAD IN THE CROESUS MINE

The unexpected discovery of an argen tiferous galena veln on the 700-foot level of the Croesus mine adds considerably to the value of that property, says the Times of Halley, Ida.

the value of that property, says the Times of Hailey, Ida.

The vein shows twenty-three inches of galena carrying 79 per cent of lead, fifty-six ounces of aliver and 26 gold per ton. It is regular, and shows every indication of a true flesure. Were there nothing else in the property, this vein itself would justify all the work that has been done at the Croesus, and would after a few months of active development repay the original investment, at least.

As already published in the Times, there are at least 199,000 tons of ore developed above the 600 level. This, however, is gold and silver ore, that carries some coaper, but no lead.

If, as likely, the ore-bearing veins followed from the surface to the 900 level continue to the 700, then the Croesus is a big mine, because it carries millions of dollars worth of gold, silver and copper, besides the new discovery.

A station is being opened at the 700-foot level, in order to admit of starting a prospecting drift there.

WABASH OF PARK TOUCHES BUTTON AGAIN

With which to discharges the payrolls and to continue the search for pay-dirt in a ledge that has been indorsed with everything but ore in commercial quantity, the management of the Wabash of Park City has called upon its stockholders for another as-sessment of 5 cents a share, or \$15,000, this to become delinquent. May 23rd, the delinquent sale to follow on June 14th. While the search has been one to try the nerves and test the tenacity of the shareholder, the condition is one that not infrequently antedetes the development of a bonanza, and the effort to find one at greater depth will con-tinue until the last nook has been

ADDITIONAL BINS AT THE FERRIS-HAGGARTY

its busy aspect and inside and out the work is progressing with vigor, says the Doublefack of Wyoming. Some delays work is progressing with visor says the Doublejack of Wyoming. Some delays have interfered with the movement of ore by the tramway and the result is that the mine has become blocked with ore broken down ready to ship. To relieve the congested condition inside the mine and also to increase the storage capacity for ore outside without requiring re-handling of the ore, the bins that were arranged to store coal for shipment over the tramway will be utilized for storage of ore. These bins will hold about 1200 tons and are so arranged that the trambuckets can be filled automatically and switched on the cables.

TO OPERATE PLACERS IN THE FAR WEST

Scott G. Elton, who has been identiscott G. Enon, who has been identified with the placer diggings of the West for many years, has gone to Plumas county, California, where, on the head waters of the Feather river, he will be the county of the called the county of the called th will begin to operate gold-bearing gravel, of which there are 1188 acres. Mr. Elton is a brother-in-law of Cashler Herman Greene of the Bingham Con., under whose ciceronage he saw the city while making his way west, and with which he was most favorably impressed. impressed.

TWO SHIFTS GOING AT G. & G. OIL BORE

Boring at the Guffey & Galey well out
of Farmington is to be prosecuted with
a second shift, the work with this to be
practically continuous until the oil-bearing stratum has been tapped.
Interest in the bore is becoming hourly
more acute and that something is going
to happen within the next thirty days is
quite generally believed.

FOR MAXFIELD

To Drain Ledge and Tap High-Grade Ore Bodies at a Great

Depth. With the present method of operat-

ing the properties of the Maxfield Mi-

ning company, in Big Cottonwood can-

yon, incurring sacrifices that are almost sulcidal, said Manager Thomas yesterday, he has recommended to the shareholders the driving of a new tun-nel by which the ledge may be tapped at a point 700 feet below the present at a point 700 feet below the present workings, and at the same time un-watering it and doing away with pumps that are now encroaching so heavily upon the resources of the mine. To accomplish this, said Manager. Thomas, if will be necessary to drive through the zone a distance of a mile, and while the task appears a most ex-pensive one, the company will have pensive one, the company will have been more than compensated. Again such an avenue would explore the company's domain, of which it has 800 acres, as would no other, while its natural course would take it through other ledges promising as much as other ledges promising as much as that on which the company has long been mining. The last consignment of ore from the property, consisting of about thirty-seven tons, was sold for \$338.41, the controls showing as much as 119.4 ounces silver and 49 per cent lead, with \$10.90 gold per ton. Of this ore four feet is now exposed in the ledge, with this occurring at no fewer han five different places. To prevent from flooding, however, pumps are ept going continuously, while the haul market is another item of consider to drain the mine, while affording an improved outlet and infinitely cheaper mining, appears to be the thing

PREPARING TO START **GOLCONDA SMELTER**

With the electrical devices for the oncentration or separation of the ores at the prospects of the Glasgow & Western Exploration company, in Nevada, in position, said Manager Stal-mann on his return from camp yesmann on his return from camp yesterday morning, the fires at the Golconda smelter will be rekindled and the active reduction of copper-bearing ores resumed. In the installation of the new plant good progress is being made, while at the mines the volume of ore is being hourly added to. On the new channel in the Adelaide group, opened up over two months ago, Superintendent Farren is still running. erintendent Farren is still running while a winze is following it on the lip, with everything favorable to permanence and quality as greater depths are attained. With conditions at each of the properties included in the compossessions, Messrs. and Farren are very much pleased, and the year should be made a most productive one.

Mining Notes.

With his minling interests all well in hand, John W. Langley has gone to his cattle reach in Idaho to take part in the spring round-up and look after the branding irons, in the wielding of which he has developed expert talent.

The new pump at the New York Bonanza, Park City, will go into commission today, when corrections on the man or

today, when operations on the main or "back ledge" will be resumed. Local in-terests are relying upon it for substantial disclosures at an early day.

disclosures at an early day

Samples of high-grade copper ore from
Spruce mountain, forty miles south of
Wells, Nev. tell the story of another ine
possibility in the Concord group of prospects, owned by a Sait Lake crowd, and
on which work is to be vigorously presecuted this season.

The new hoist at the Tetro of Tintle is
being installed and promises a considerable increase in the output of ore.

Capt. Tibbits leaves for Nevada today
to conduct an examination of mining
property.

Last night's arrivals from Bingham re-port rumors of another development of high-grade ere in the Boston Con. "Papa" C. M. Freed has purchased a chair on the mining exchange, which will enable him to get into closer touch with

his securities. Ole Olsen, superintendent of the Gold Development company's properties out of Richfield, reports the Log Cable tunnel now 620 feet thin the group, with cre of milling quality still furthe breast.

The official announcement is made that the Sacramento of Mercur will taus the May dividend. Glen R Bothwell, manager of the property, has gone to camp to superintend the leading of another consignment of quicksliver for the Eastern market, and with this disposed of breadmonsy will have been provided.

Created Wealth

from a desert. Such is the history of irrigated sections. Take land that sells for fifty cents an acre, put water on it, and it sells for-what? There are quarters of land in the irrigated sections of Colorado that cannot be \$20,000

Something from nothing-a garden

and yet you can purchase in the Big Horn Basin of Wyoming and in the North Platte Valley of Nebraska irrigated land for \$15 an acre up, where climatic conditions are healthful and exhilarating, where the water supply is plentiful and inexhaustible, and where fuel is abundant and Let me send you booklets telling all

about these bargains.

Ticket Office, 79 W. Second South St.

R. F. NESLEN, General Agent. SALT LAKE CITY.

GOOD TOOLS ARE FOR GOOD CARPENTERS.

Then every good carpenter should use the kind we sell. We have the best of everything that up-to-date carpenters

need, and the prices are right.

We want every carpenter in Salt Lake to see our Ford ship Augers and ship Auger car bits.

They are the only Augers made that will bore through such wood as Washington fir the entire length and not clog. They will draw in without any pressure on the hardest knot or frozen wood.

THE SALT LAKE HARDWARE CO.,

EVERYTHING IN HARDWARE.
